

# WATER CHANNEL

## Aquaporin

### Monomer Models

### Tetramer Models

### *Structural Representations of Aquaporin (4NEF) as a monomer and tetramer:*

**Monomer** (side view): A. Ribbon model; B. Ribbon model with hydrogen bonds (purple) and extended nonpolar side-chains; C. Ribbon model with extended nonpolar side-chains and transparent surface; D. Surface model.

**Tetramer:** Top view: E. Ribbon model; F. Ribbon model with hydrogen bonds and transparent surface; G. Surface model. Side view: H. Ribbon model; I. Ribbon model with transparent surface; J. Surface model.
